## Digital Dental Solutions-Implantology & Prosthetics

Besmile is a leading company specializing in R&D, manufacturing, sales and service of CAD/CAM materials, digital dental equipment and implant systems with headquarters in Chengdu, China and a subsidiary in California, USA.

With more than 10 years of experience in implantology and prosthetics, Besmile has become a total dental solution provider in digital dentistry, effortlessly striving to create the best smiles for dental technicians, dentists, and patients, etc with innovative technologies.

### Independent R&D

We are committed to independent research and development, consistently driven by innovation and focused on meeting customer needs, with R&D staff accounting for 20% of the company's workforce and over 20% of annual revenues invested in R&D each year.

### In-house manufacturing

We insist on in-house manufacturing. All of our products are manufactured in-house in a 50,000 square metre, digitally controlled production facility, enabling precise mass production, efficient delivery and hassle-free operation.

### Extensively clinically tested

Our implants and implant components have been extensively tested by authoritative dental organizations and institutions ( West China School/Hospital of Stomatology etc.) with a 3-year survival rate of up to 99%.

### Proven by the market & customers

We are proven by over 4 million dental implant component cases in the market, with an incidence of technical complications of only 0.0002%, far below the industry standard.

### Registered and certified by CE, FDA

We have received 29 authoritative certifications, 105 patents, including 5 patents of dental implant components. Our dental implant components are registered and certified by CE, FDA, NAMPA, etc.

# EXQUISITE CRAFTSMANSHIP EXCEPTIONAL QUALITY

## Wide compatibility

Compatible with

95%

Implant systems

40+

Implant brands

100+

Types of interfaces

## Premium materials

Use premium raw materials from the same manufacturer (Carpenter Technology Corporation) as the world's leading implant brands with the mechanical strength of **>1000Mpa**

## High precision

High-end manufacturing precision ensured by the precision machining on multi-axis CNC machine with **micron-level** machining accuracy

## Strict quality control

Guaranteed by **8** inspection processes, **100%** interface quality inspection for a perfect match with the implant systems thanks to precise dimensions , fit clearance and profile.

## High quality

Proven with over **4 million** dental implant component cases in the market , with incidence of technical complications of only **0.0002%**, delivering much higher quality than similar products on the market

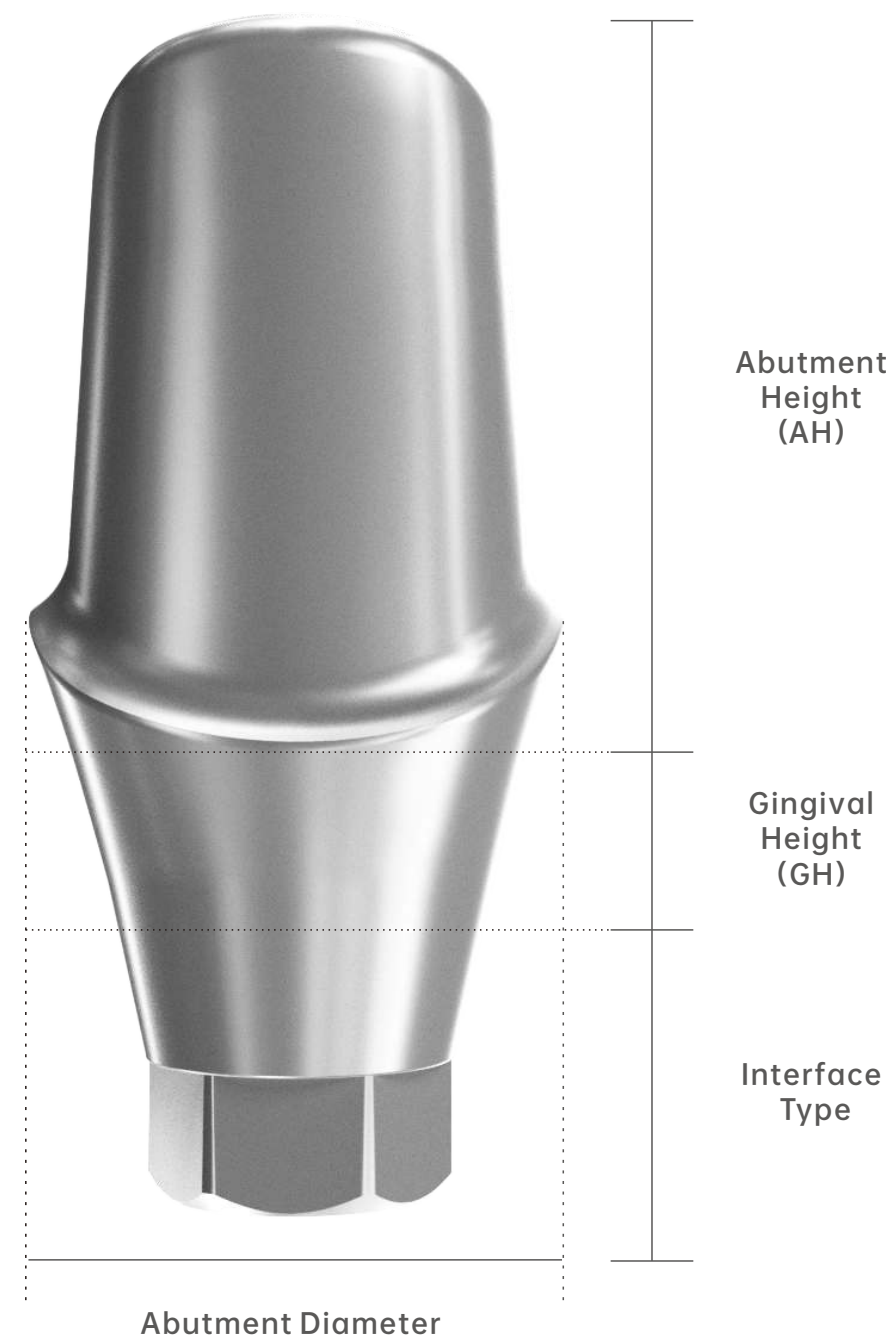

## Exceptional service

Access to exceptional service of BSM.

# CUSTOM IMPLANT COMPONENTS

## Custom
